Hauthaway XS-4114-N

DESCRIPTION: XS-4114 is a solvent based, water-repellent treatment for fabrics, porous surfaces, wood, and selected plastics. This treatment improves water repellency, stain- and dust-resistance.

SUGGESTED USES: This treatment can be applied to outdoor articles such as awnings, tarps, boat covers, grill covers, and automobile convertible tops to provide or restore water-, stain- and dirt-resistance.

CHARACTERISTICS:

- ▶ Flammable liquid
- ▶ Does not form a film on the substrate surface
- ▶ Does not yellow with heat or UV exposure
- ▶ Mildew resistant
- ▶ Does not stiffen flexible materials.
- ▶ Solvent odor

APPLICATION: The treatment can be applied by dipping, brush, roller, or sponge brush. A thin coating is suggested. Multiple coatings can be applied to ensure complete coverage.

DRYING CYCLE Moving warm air will remove the solvent carrier. Curing will take place at room temperature within a 24 to 36 hour time span. High heat is not needed to set the treatment.

PHYSICAL PROPERTIES: (typical)

SOLIDS:	25%
VISCOSITY:	100 cps
Wt/gal:	6.1 lbs/gal
Flash Point:	57 °C
